Sub \Rightarrow Math

Ch \Rightarrow 6

Class \Rightarrow I

★ Expanded Form \Rightarrow We can write a number as the sum of the place values of its digits. It is called expanded form of the number.

In expanded form, we write

(a) $96 = 9 \text{ tens} + 6 \text{ ones} = 90 + 6$

(b) $40 = 4 \text{ tens} + 0 \text{ ones} = 40 + 0$

\Rightarrow Now, write the following numbers in their expanded form.

(i) $63 \rightarrow \boxed{6} \text{ tens} + \boxed{3} \text{ ones} = \boxed{60} + \boxed{3}$

(ii) $84 \rightarrow \boxed{8} \text{ tens} + \boxed{4} \text{ ones} = \boxed{80} + \boxed{4}$

(iii) $79 \rightarrow \boxed{7} \text{ tens} + \boxed{9} \text{ ones} = \boxed{70} + \boxed{9}$

(iv) $20 \rightarrow \boxed{2} \text{ tens} + \boxed{0} \text{ ones} = \boxed{20} + \boxed{0}$

(v) $45 \rightarrow \boxed{4} \text{ tens} + \boxed{5} \text{ ones} = \boxed{40} + \boxed{5}$

(vi) $99 \rightarrow \boxed{9} \text{ tens} + \boxed{9} \text{ ones} = \boxed{90} + \boxed{9}$

(vii) $81 \rightarrow \boxed{8} \text{ tens} + \boxed{1} \text{ ones} = \boxed{80} + \boxed{1}$
