(ii)

Hundreds	Tens	ones
6	5	3
- 5	8	8
1	2	6

\Rightarrow Borrowing from tens and hundreds.

Let us subtract 488 from 653.

\Rightarrow Step 1: first, we arrange the numbers and subtract the ones.

But $3 < 8$

so, we have to borrow from tens.

Hundreds	Tens	ones
6	5	3
- 4	8	8

Expanded form

653 = 6 hundreds 5 tens 3 ones

-488 = 4 hundreds 8 tens 8 ones

\Rightarrow Step 2: We borrow 1 ten (= 10 ones) from tens. After borrowing, 5 tens become 4 tens and 3 ones become 13 ones.

Hundreds	Tens	ones
6	4	13
- 4	8	8

Expanded form = 653 = 6 hundreds 4 tens 13 ones

-488 = 4 hundreds 8 tens 8 ones
