Q/4. Subtract the difference of 547533 and 763257 from 583460.

Solu. $583460 - (763257 - 547533)$
 $= 583460 - 215724$
 $= 367734$

Practice Time:- 6.2

Solve the problems:

Q3. John has ₹ 72340 as his savings. He spent ₹ 45720 out of this to buy a new motorcycle. What amount of money is left him?

Solu. Saving money = ₹ 72340
Spent money = ₹ 45720
Left amount = ₹ 72340 - ₹ 45720
 $= ₹ 26620$

Q11. The sum of two numbers is 86310. If one of the numbers is 37982. Find the other number.

Solu. Sum of two numbers = 86310
One number = 37982

Other number = $86310 - 37982$
 $= 48328$

Practice Time:- 6.3

A. Solve the problems:

10. The population of a city is 48215. If there are 25980 men and 19340 women, find the number of children in the city.

Solu. Total population of a city = 48215

Number of men in the city = 25980
Number of women in the city = 19340

Number of children in the city,
 $48215 - (25980 + 19340)$
 $= 48215 - 45320$
 $= 2895$
