numerous root growing from base.

* Short Answer type questions:

1. How are plants useful for us?

Ans. Plants purify the air, we get lot of things from plants like food, fresh air, fruits, vegetables, flowers, etc.

2. What are the functions of root?

Ans. Roots usually grow underground. The roots provide support to the plant by fixing it to the ground. Roots absorb water and nutrients from the soil for the plants.

3. What are the functions of stem?
